

Dear Katy & Pat Angello and CCHS Class of 1987,

I would like to thank you sincerely once again for your generosity! I was deeply touched to receive such an honor and I greatly appreciate your support.

The Circuit City gift card helped me tremendously and alleviated some of my financial pressures. I was able to purchase the computer that I needed to support the main CAD programs I work with and required by my major. It further motivated me to continue working hard and truly impacted my performance in school. I was able to accelerate and become recognized among my colleagues for my ability to quickly model what I envision through software.

Throughout my youth, I was always inspired by the build environment and loved to design, create and build. Driven by my premature interest in architecture, I took architectural and engineering classes in Cherry Creek High School, where I designed and built a model of a residential house, as well as a bridge model for a weight load test. Since then, it became clear to me that architecture is my true calling in life. This led me to graduating bachelors with honors in Environment and Design with emphasis in architecture at the University of Colorado – Boulder, where I have accelerated due to my passion, dedication, and ability to work under pressure and meet deadlines. My future plans include earning a Master Degree in Architecture and becoming a licensed professional who serves communities with functionality, harmony, and innovation.

Once again, I am thrilled and grateful and I will never forget the generosity of CCHS Class of 1987. Cherry Creek High School will not be as prestigious as it is today without the legacy of excellence established by the classes that have come before mine.

Sincerely,

~Toni~
